

R2 Business Intelligence

Real-Time snapshots of business operations, dashboard, alerts, notifications and reports delivery

Unique Business Systems

R2 Business Intelligence

Any business tool is that much more valuable when it guides your actions towards better business decisions. A business intelligence module is a mission critical element of any business suite.

R2 BI module offers you business intelligence in three key areas:

- Get real time snapshot of your operations at any given point via configurable dashboards
- Proactive alerts and notifications for key milestones, triggered by rules you determine
- User definable reports run on a specific frequency and delivered specified users

Collecting information is a basic software functionality that most software caters for. It is how that data is presented and the insights it provides leads to fast, informed decision to hugely differentiate your operations.
