

R2 Service and Repair

Service Ticket Management to Minimize Downtime and Costs

Unique Business Systems

R2 Service and Repair

Maximizing and optimizing physical/financial utilization of equipment is critically important. One way of achieving this goal is to minimize down time and maximize the life and availability of each asset in your inventory.

R2's Preventing and Corrective Maintenance module offers your team benefits in these key areas:

- Automated, simple and easy scheduling of preventive maintenance base on your parameters
- Easily create service tickets with detailed data capture and pair with our mobile app for field use
- Track and analyze service history, warranty info, ROI and other metrics
- Minimize service costs and downtime
- Maximize equipment revenue and availability

Collecting information is a basic software functionality that most softwares cater for. It is how that data is presented and the insights it provides to enable fast, informed decisions that will hugely differentiate your operations.
